DETAILED ACTION

Claims 31, 36-38, 40-47, and 55 are pending in the instant application.

Response to Amendment

1. Receipt is acknowledged of Applicants' Supplemental Amendment, submitted January 27, 2004, and Response to Non-Compliant Amendment, submitted March 1, 2004, which have been reviewed by the Examiner and entered of record in the file. Accordingly, claims 31, 36, 40, and 43 have been amended.

Allowable Subject Matter

2. In view of the amendatory changes to add a proviso to the claims and to correct indefiniteness issues, claims 31, 36-38, 40-47, and 55 are allowable over the prior art as newly renumbered claims 1-13.

3. The following is an examiner's statement of reasons for allowance:

This invention relates to novel chalcone coumarin compounds and their pharmaceutical compositions. Chalcone coumarins are known in the art as having anticoagulating activity and the ability to increase blood circulation in capillary vessels, increase capillary vessel permeability, and as being coronary vasodilators. However the aspect of preparing the instant claimed compounds, which exclude the known compounds (wherein R1 is methyl and Ar is 3- or 4-pyridyl) is novel and unobvious. In order to overcome the anticipation and obviousness rejections, Applicant has added a proviso to exclude the existing compounds that read on the instant claims, and since the instant claimed compounds are unsubstituted except for the 2, 4, 7, and 8 positions, they also differ from the prior art coumarin-pyridines. After a thorough search, the closest prior art of record, Thakar et al. and FR 2387956, both discussed in the previous

Office Action, disclose similar chalcone coumarins. However, the prior art does not fairly suggest the preparation of the instant claimed 8-coumarinyl pyridine compounds, which do not belong to the same homologous class of compounds of either Thakar et al or FR 2387956. The formal issues have been completed with the deletion of the overlapping subject matter from the claims, and the amendments to obviate the 35 U.S.C. 112 issues. Therefore the prior art fails to teach or render obvious the instant compounds since the reference patents do not specifically recite the same 8-coumarinyl pyridines as instantly claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Janet L. Coppins whose telephone number is 571.272.0680. The examiner can normally be reached on M-F 8:30-5:00.
